

**MERCED IRRIGATION DISTRICT
NETWORK ENGINEER**

FLSA Status – Non-Exempt
Unrepresented – Grade N

DEFINITION:

Under direct supervision of the Information Technology Manager the Network Engineer will analyze, plan, install, evaluate, monitor, test, support, maintain, and upgrade a variety of network systems including local area networks as well as wide area networks, VoIP communication systems, virtual environment systems, storage area networks and backup solutions. Provide highly responsible technical support to multiple District departments, user requirements analysis, systems analysis, problem resolution, evaluate and make recommendations for ongoing system development. Contact equipment and software vendors. Perform related duties as required.

ESSENTIAL FUNCTIONS OF THE POSITION:

- Demonstrate a strong commitment to customer service.
- Assist with planning, installing, evaluating, monitoring and maintaining client/server operating system releases, enhancements and/or application software that resides on personal computers or on network systems.
- Assist all end users in the District when they encounter operational hardware or software problems on their individual work computers.
- Assist with establishing and enforcing standards and procedures relating to operating systems software products, backup and recovery procedures, group policy management and security procedures/policies.
- Assist with the execution of Networking/Communications (LAN/WAN/ Wireless) projects.
- Assist in developing LAN/WAN/Wireless system requirement definitions and documentation.
- Assist in developing functional back up / disaster recovery plans, and technical specifications.
- Assist in resolving LAN/WAN/Wireless connectivity issues and maintenance.
- Assist with the installation, repair, and maintenance of Voice over Internet Protocol (VOIP) telecommunications systems and equipment.
- Assist with LAN/WAN/ Wireless upgrades, support, and maintenance.
- Assist with developing cost data used for LAN/WAN/Wireless project cost estimating and budgeting purposes.
- Resolve LAN/WAN/Wireless connectivity issues and maintain LAN/WAN/Wireless and Internet connections.
- Utilize current and emerging networking, communications or operating system technologies.
- Monitor the overall performance of network operating systems, VoIP, virtual environments, storage area network and communications software, and resolve problems as required.
- Support server/network based application software products installed throughout the District including connectivity with multiple remote sites.
- Provide critical technical information and data as needed for timely management decisions.
- Consult with manufacturer's representatives to define hardware / software capabilities and maintenance requirements.
- Design and engineering of LAN/WAN/Wireless installations.
- Develop LAN/WAN/Wireless system requirement definitions and functional and technical specifications.
- Carry out LAN/WAN/Wireless system analysis, at the workgroup, department or enterprise level.

- Participate in LAN/WAN/Wireless installations and configurations including hardware installation and maintenance.
- Perform related duties as required.

QUALIFICATIONS:

Any combination of experience and education that would prepare the candidate for the duties and responsibilities of the position is acceptable.

Education:

Any combination of education and experience that would provide the required knowledge and skills may be qualifying.

- Bachelor of Science Degree from an accredited college or university with a major course work in computer science, information systems, business information systems, business administration or a related field is desirable.
- CCNA or CCNP professional certifications are required.

Experience:

- Five (5) years of increasingly responsible experience designing, managing, and modifying computer networks and installing/ troubleshooting software applications and peripheral equipment.

Ability to:

- Communicate effectively orally and in writing.
- Coordinate and facilitate work with others and train and guide others.
- Lift and move equipment weighing up to 60 pounds.
- Troubleshoot and perform routine maintenance on computer systems.
- Reason logically, use a variety of techniques to resolve problems, manage time and resources, concurrently handle multiple assignments and work under deadlines.
- Configure desktop computers and related peripherals.
- Work outside of normal business hours
- Learn and adapt quickly to changes in technology

Knowledge of:

- Microsoft Windows Operating Systems
- Microsoft Office Suite
- Data Communications hardware, software, protocols and technologies including switches, routers, firewalls, WAN, LAN, 802.11x, TCP/IP, Ethernet Wiring
